SUMMARY

Results-oriented professional with over a decade of experience in software development and project management, specializing in scalable web applications, microservices architecture, and cross-functional team leadership.

EDUCATION

Example College <i>Master of Science in Engineering GPA: 3.9</i>	09 2014 - 06 2016 <i>Another City</i>
University of Example <i>Bachelor of Science in Computer Science GPA: 3.8</i>	09 2010 - 06 2014 <i>Example City</i>

EXPERIENCE

Senior Software Engineer <i>Tech Solutions LLC</i>	01 2010 - 06 2014 <i>Tech City</i>
<ul style="list-style-type: none">Architected and implemented a microservices-based platform handling millions of daily transactions.Mentored junior developers on best practices in software architecture and design patterns.Automated deployment processes using Jenkins and Docker, improving deployment frequency by 50.	
Software Engineer <i>Example Corp</i>	07 2014 - Present <i>Example City</i>
<ul style="list-style-type: none">Developed and maintained high-traffic web applications using JavaScript, HTML, and CSS.Led a team of 10 engineers through agile development cycles, resulting in 20 faster delivery times.Implemented performance optimizations, reducing server response times by 40.	

PROJECTS

Project Management Tool <i>React, Node.js, MongoDB</i>	01 2020 - 06 2020
<ul style="list-style-type: none">Conceptualized and developed a project management tool used by over 1000 users.Integrated real-time collaboration features using WebSockets, enhancing team productivity.Implemented comprehensive unit and integration testing, achieving 95 code coverage.	
E-commerce Platform <i>Angular, Spring Boot, PostgreSQL</i>	07 2018 - 12 2019
<ul style="list-style-type: none">Designed and deployed an enterprise-grade e-commerce platform supporting 100,000+ SKUs.Optimized database queries and indexing strategies, improving query performance by 60.Implemented robust security measures and compliance with PCI-DSS standards.	

TECHNICAL SKILLS

Programming Languages	JavaScript, Python, Java, C, Ruby, Go, PHP
Frameworks Libraries	React, Node.js, Express, Angular, Spring, Flask, Django, Laravel
Databases	MongoDB, MySQL, PostgreSQL, SQLite, Redis, Elasticsearch
DevOps Tools	Docker, Kubernetes, Jenkins, AWS, Azure, Git, CI/CD pipelines
Methodologies	Agile Development, Scrum, Kanban, Continuous Integration, Continuous Deployment, CI/CD
